

#### PLEASE REVIEW

Proof of residency and birth certificate are required to verify age and maintain parity in the Little League program. Please download a copy of the [Residency Requirements](#). Within each account there is the ability to upload and update information. If you are registering as a first-time participant, please select the first division available for your child's LEAGUE AGE. Click **Show Details** to see the suggested League Age for enrollment. Here is [a chart](#) to assist. If your child is more advanced or has previous experience, please select the next division available.

We reserve the right to modify a player's division based upon age, prior experience, and demonstrated abilities. Parents/Guardians will be given insight into the decision should we determine the need to move a player to a new division.

If you are unsure if your school or address is within our league boundaries, please take a moment and use the [Little League - League Finder](#) to locate your home league. There are unique circumstances that may be considered for a player who lives and/or schools outside of our league boundaries albeit not always guaranteed. To inquire, you must know your home league, inform us of your home league, and express, in writing, the reason why you want your child(ren) to play for Calumet Region Little League instead of your home league. Send your inquiry via email to President Bentley Ellis at [bentleyellis@calumetregionll.org](mailto:bentleyellis@calumetregionll.org).

**Note: Beginning in 2025, children ages 7 and below are welcome to join any home league they desire. Older siblings are welcome to follow so long as the younger sibling plays continuously with that same desired league from age 8 and up.** If you have trouble completing registration for a child age 4 - 7 (and his/her sibling(s)) due to the child's school and/or residence address being out of our league boundaries, email us. Include the name, birth date, and address of the child(ren) you wish to register. See [2025 Regulation 2 Update](#).
